LAPR Office: 352-595-8863

Fish farm Office: 352-595-1700

Service Report

Date: November 13, 2023

Biologist: Doug Charles

Client: Palencia, Marsh Creek CDD

Ratings: 1 – 10 (Best is 10)

Waterways: 32 ponds

Herbicides used: None

Lake N: Rated: 9

- Minor bacopa
- Moderate debris was blown to south side.
- Minor cyanobacteria (looks like green paint on surface) blown to south end.

Treatment: I hand raked debris, and some topped out bacopa.

Recommendations: Stock 15 more grass carp.

Lake SV3: **Rated: 5**

- Heavy aquatic clover.
- Moderate to heavy floating algae from decaying clover.

Treatment: I will treat next Monday when I have permission to access through easement.

Recommendations: Stock 20 more grass carp.

Service Report

Lake L: Rated: 5

- Heavy floating algae that has floated from lake bottom after last treatment.
- Water level is at normal level.

Treatment: Weather conditions were poor for algae treatment (need sunshine for the algaecide to work properly). I hand raked some of the algae.

Recommendations: I plan to treat next Monday. I will stock 20 more grass carp this Winter.
