LAPR Office: 352-595-8863

Fish farm Office: 352-595-1700

## Service Report

Date: March 6, 2023

Biologist: Doug Charles

Client: Palencia, Marsh Creek CDD

Ratings: 1 – 10 (Best is 10)

Waterways: 32 ponds

Herbicides used: Schooner, Glyphosate

Comments: I am very pleased to report that the two largest and most challenging lakes to manage are now in balance, and my integrated aquatic management program is working extremely well.

Lake Y-2: **Rated: 9**

- There is minor floating bladderwort around the perimeter.
- There are also minor amounts of pulled up spikerush from grass carp feeding.
- There is some torpedo grass starting around the perimeter.
- No alligators observed.

Treatment: I launched the airboat and treated the bladderwort and torpedo grass.

Recommendations: Keep an eye out for gators. Gators must be controlled for my biological program to work.

**Lake L:**   **Rated: 10**

- Minimal shoreline grasses, no submersed weeds.
- Water level is a little low.
- No gators observed.

**Treatment:** I launched the airboat and treated the shoreline grasses.

**Recommendations:** Keep a lookout for gators.
